Project Name	Strategic Product Placement Analysis: Unveiling Sales Impact with Tableau Visualization

Problem – Solution Fit

Retail stores often struggle to understand how product placement (eye-level shelves, end caps, checkout counters, aisle positioning) impacts sales performance. Decisions about placement are frequently based on assumptions rather than data, leading to:

Purpose

- To analyze the impact of product placement on overall sales performance.
- To identify high-performing shelf positions such as eye-level, end caps, and checkout areas.
- To use Tableau for creating interactive dashboards and visual reports.
- To compare sales performance before and after placement changes.
- To optimize store layout for better space utilization and higher revenue.
- To support data-driven decision-making in retail management.
- To improve visibility of high-margin and promotional products.
- To enhance overall profitability through strategic product positioning.

Strategic Product Placement Analysis: Tableau-Powered Sales Impact Visualization

1 CUSTOMER SEGMENT(S) CS
[cite: CS]

- Category Managers
- Merchandising Teams
- Store Operations Analysts

6 CUSTOMER CONSTRAINTS CC
[cite: CC]

- Disconnected sales & location data
- Reliance on gut-feelings, slow reporting from legacy systems

5 AVAILABLE SOLUTIONS AS
[cite: AS]

- Manual spreadsheets, static
- planograms (PDFs), fragmented reporting

Pros & Cons:
- Familiar / Time-consuming

2 JOBS-TO-BE-DONE/ PROBLEMS JP
[cite: JP]

- Uncover "dead zones," calculate shelf space ROI, predict lift from changes

7 BEHAVIOUR BEH
[cite: BEH]

- Reactive adjustments, ignoring physical context, limited A/B testing capability

9 PROBLEM ROOT CAUSE RC
[cite: RC]

- Siloed databases, lack of integrated spatial and sales analysis

3 TRIGGERS TR

- Declining sales, new product launches, competitive moves

4 EMOTIONS: BEFORE / AFTER EM

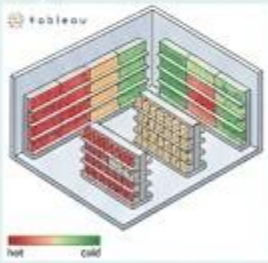

- Industry conferences, retail analytics webinars, software selection committees

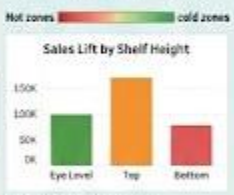

Frustrated → Empowers

10 YOUR SOLUTION SOL

- **Tableau Visualization:** A detailed, colorful Tableau dashboard visual, showing a 3D store floor plan and shelf heatmap. Key visual elements include on shelf locations.

Tableau ınr: data androlit zonets

Weekly Salcement:

- Unified view, data storytelling, dynamic insights
- CHANNELS OF BEHAVIOUR
